

B-Green-Ed

Boosting the Green Future via University Micro-Credentials

Project № 2022-1-BG01-KA220-HED-000085821

KA220-HED - Cooperation partnerships in higher education

Reflecting on Success

As the B-Green-ED project nears its completion, we look back on the transformative journey we have undertaken since its inception. Over the last two years, the B-Green-ED consortium has made significant strides in promoting green, innovative methodologies across educational and standardisation sectors. The project, which aimed to boost the green future via university micro-credentials, has concluded with a series of successful events, culminating in the final international conference held in Burgas, Bulgaria, in September 2024.

Multiplier Events

Throughout 2023 and 2024, the B-Green-ED project has hosted a series of Multiplier Events designed to disseminate the results and innovative methodologies developed during the project. These events were held across various locations and featured diverse stakeholders, including educators, business leaders, and researchers from multiple countries.

These events provided platforms for in-depth discussions on how the B-Green-ED project's innovative approaches can be implemented across different educational systems and industries. They also served as key touchpoints for sharing insights on the project's impact and potential for further development.

Upcoming Activities

2024 September 1-30

Multiplier Events at all partner institutions.

26-27 August, 2024 the transnational partner meeting took place at Burgas Free University (Bulgaria).

The meeting discussed the project implementation activities and their quality, agreed on the dissemination of the outcomes and the results of the pilot trainings in all partner countries.

B-Green-ED Project Hosts Final International Conference in Burgas

On September 26, 2024, the city of Burgas, Bulgaria, played host to the final international conference of the B-Green-ED project. Organized by Burgas Free University, the lead institution for the project, the event served as a comprehensive review of the project's achievements and innovations.

The conference welcomed over 50 delegates from educational, research, and business organizations representing countries such as Bulgaria, Canada, the Czech Republic, Hungary, Italy, and Serbia. Among the highlights of the day were presentations by Bulgarian partners BFU and BDS, who showcased the collective efforts of the B-Green-ED consortium.

Discussions during the forum focused on the transferability and practical application of the innovative methodologies developed within the project, with special attention given to how these ideas could benefit diverse audiences across various sectors.

The event marked a significant milestone in the B-Green-ED project, demonstrating the global collaboration and innovative spirit that has defined its success.
