

## B-Green-Ed

### Boosting the Green Future via University Micro-Credentials

Project № 2022-1-BG01-KA220-HED-000085821

KA220-HED - Cooperation partnerships in higher education

#### Background of the project

The project consortium chose to address as a main priority Environment and fight against climate change as the project envisages elaboration of training materials for higher education courses related to standards in the areas of management systems and environmental standards and support for the university lecturers for producing innovative micro-credentials.

The project will encourage an innovative method of teaching at universities by using digital technologies. The training materials and the trainings will be performed online, some of the digital materials will become open educational resources, which could be further used by other universities or interested educational institutions.

#### The main objectives of the project are:

The main objective of the project is to boost the European green economy and climate neutrality through the development of innovative HE practices related to the implementation of micro-credentials designed in cooperation with European standards bodies that meet the market needs and facilitate the provision of flexible, accessible, and inclusive education in relevant industry/sector standards that support the transition to a green and digital economy.

#### Upcoming Activities

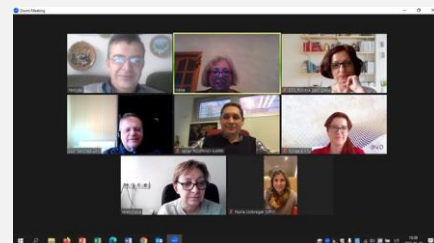

June 12 - 13

Second Transnational Partner meeting in Valencia (Spain)

6-7 December, 2022 the kick-off meeting took place in Sofia (Bulgaria).

18 January, 2023. partners meet online. Project activities such as national reporting, dissemination tools and quality assurance issues were discussed.
